```ruby
class Greeter
  def initialize(name) = @name = name
  def hello = puts "Hello, #{@name}!"
end
```

Python

```python
def fib(n: int) -> int:
    # naive recursion
    return n if n < 2 else fib(n - 1) + fib(n - 2)

print([fib(i) for i in range(10)])
```

TypeScript

```
interface User { id: number; name: string }
const users: User[] = [{ id: 1, name: "Ada" }]
export const names = users.map((u) ⟹ u.name.toUpperCase())
```

Shell

```
#!/bin/bash
for f in *.md; do
  echo "Processing $f"
done
```

C++

```cpp
#include <iostream>
int main() {
    std::cout << "Hello" << 42 << '\n';
    return 0;
}
```

JSON

```
{ "name": "hype", "version": 1, "tags": ["slides", "markdown"], "ok": true }
```

No language

```
plain text fence
    with indentation
  and no highlighting
